BIGFOOT BARRIER is designed for use under mechanically attached asphalt shingles, metal roofing and tile, replace of 15# or 30# felt.

DECK PREP: All protrusions from the deck area must be removed and ensure the deck has no voids, damaged or unsupported areas. Deck surface should be free of debris, dry and moisture free.

EXTENDED EXPOSURE: BIGFOOT BARRIER is not designed for indefinite outdoor exposure(see warranty for exposure time based on specific product) the final roof covering must be installed in according to BIGFOOT BARRIER exposure guidelines. Depending on roof pitch and surface conditions, it is recommended that roof jacks, toe-boards. or a storage platform be secured to support roofing material placed on the roof.

Safety Precautions & Limitations: Depending on roof pitch and surface conditions (wet, dusty, frost), the coefficient of friction may

change, and the surface can become slippery. Use caution when walking on the roof deck, and OSHA-compliant fall protection.

BIGFOOT BARRIER synthetic underlayment is not designed as a primary roof covering, and should not be left exposed beyond 30 days prior to installation of the final roof cover. Do not walk or stand on the BIGFOOT BARRIER until it is attached to the roof deck according to installation instructions.

Simple to Apply: Installs quick and easy, provides 17% more coverage per course than a standard roll of 30# felt.

**Reliable:** Highly water-repellent, reduces warping, wrinkling, and cracking in cold

**100% Recyclable:** 100% inorganic, will not rot or mold, considered a Green Building Product. Price is competitive with 30# felt.

**Cool Gray:** Unique gray high-traction top layer which reduces heat and provides a cooler working surface.

enhance the skid-resistant properties of the synthetic roofing underlayment, protecting against costly slips and falls.
